THE BRAVEST OF JACKSONVILLE'S POPU-LACE NOW LOSE HEART.

Vellew Jack Brenks Out in Fresh Ounrier and in Greater Virolence-The Healthiest and Best People Fall Victims to the Plague-Physicians Smitten Down at the

SEPECIAL TO THE EVENING WORLD, JACKSONVILLE, Sept. 8 .- The plague is in creasing in malignity, and this fact, with the knowledge that Surgeon-General Hamilton's quarantine condemns the people to face it, whether or no, has created almost a panic. So long as the mortality was confined to

the aged, weak and sickly, and the disease appeared to be of a mild type, strong men were willing to remain and face it. Yesterday's record, however, was enough to carry terror to the bravest heart. Seventy people were attacked by the terrible disease and eight fell victims to its viru-

lence. Among these were strong and healthy men, and those who had prided themselves on their strength and virility to carry them safely through a contest with the monster begin to doubt their ability to cope with the fever.

It was the worst day in the history of the plague's visit, but it was mild compared with what is promised. Since the official statement last night several deaths have been with

reported and new cases are developing with mushroom rapidity on all sides. Chairman Stansell has completed his census which reveals the presence of many more

Chairman Stansell has completed his census which reveals the presence of many more people than were popularly supposed to have remained in the city. The total number of whites in the city is 3,945; of negroes, 9,812. Of this number only 1,491 expressed a willingness to leave the city, but should the census be taken to-day this number would be largely increased because of the panicky feeling which prevails.

The negroes, especially, refuse to leave, having been imbued with the idea that the effort to depopulate the city is a political trick to deprive them of their votes.

Curses loud and deep are mingled with the mention of the Surgeon-General's name for his insistence on a ten days' quarantine at Camp Perry for retugees. He telegraphs Chairman McQuaid that the State Boards of Health of the adjoining States insist on the Augusta agreement and that the quarantine must be preserved. He promises, however, to improve the wretched camp and to make his headquarters there.

Murphy and Saluda, N. C., and Hole Springs, Tenn., have opened their doors to refugees, but no trains are furnished for their transportation.

Among the fever's victims yesterday were Drs. Cone Williams and Frank C. Watson, both druggists. Dr. Fernandez and Dr. Leonard are still critically ill, while Dr. Betts is improving.

Nor is it alone in the matter of medical assistance that the appeal has been answered. Forty frained inurses—volunteers—are here or on their way to the city. ## FOR STRICKEN JACKSONVILLE.

Money, Nurses and Ald of All Sorts Generously Furnished by New York.

THE WORLD'S fund for the relief of the Jacksonville sufferers had reached the sum of \$359,10 this morning. H. B. Hollins & Co., keeping their list open yesterday, brought their fund up to \$985, all of which has been forwarded by telegraphic order. Mayor Hewitt had acknowledged up to this morning the receipt of \$3,345.35.

At a meeting of Tammany Hall Committee on Organization! last night the districts were called in order, by resolution, for the jurpose of receiving subscriptions for the fever sufferers, and \$2,500 was speedily raised.

There were numerous meetings of business

There were numerous meetings of business men, ladies' societies, philanthropic associations and other bodies yesterday, at which arrangements were made and plans discussed for the aid of the Jacksonville people. The interest and sympathy are widespread in the city, and the outcome will be very generous in all respects.

Not less grateful than the pecuniary aid extended to the sufferers is the supply of trained nurses which New York will furnish. Every day sees new volunteers step forward in this line, and provisions for getting them to the plague-stricken spot are made at once. Manager H. Clay Miner is to send, at his own expense ten nurses to be carefully selected from the Bellovue force.

A Tremendous Scanation would have been created one hundred years ago by the sight of one of our modern express trains whissing along at the rate of sixty miles an hour. Just think how our grandfathers would have stared at such a spectacle! It takes a good deal to astonish people nowadays, but some of the marvellous cores of consumption wrought by Da. Pierce's Golden Missiral. Discovery have created wide-spread amascanest. Consumption is at last acknowledged curable. The "Golden Medical Discovery" is the only known remedy for it. If taken at the right time—which, bear in mind, is not when the lungs are nearly gone—it will go right to the scat of the discase and accomplish its work as nothing else in the world can.

He breakfasted by himself in his room, and for solids he discussed bluefish, beefsteak and lamb chops.

## THE MAYOR AND JUSTICE MURRAY.

Former Is Re-Elected.

A morning newspaper this morning intimated that Mayor Hewitt had changed his mind about taking no active part in the present campaign, and would by letters and speeches advocate the election of the Democratic national ticket. There was a crowd of newspaper reporters waiting at the City Hall when the Mayor arrived there this morning to ask if this was true. "I won't answer such questions," answered

the Mayor. "They are impertinent. I am an American citizen and have the same right as any other citizen to vote for whom please and I meen to use that right, but will not talk about it."

LOOK OUT FOR THE CYCLONE. The Monster Has Started, and Danger Sig-

nals Are Flying on the Coust. That obstreperous West Indian evolone which has been cavorting around the Guif of Mexico for the last two or three days in a whirligig sort of fashion, has at last started off for the great Atlantic, and at the latest advices this morning had begun its passage over the Florida peninsula. This was indicated by the fact that at

Titusville, Fla., the wind had risen to a velocity of thirty-six miles an hour and was still increasing in force, and that all around that region there had been an unusually heavy rainfall, which is said to be always the

precursor of a simon-pure cyclone.

The amount of rain that fell in Jacksonville last night was 2.48 inches, and at Point Jupttor 1.64 inches. There is reason to believe that if the edge of the hurricane gets as far north as Jacksonville before it leaves Florida that it will give Yellow Jack a pretty lively shaking up, if it does not blow him off to sea altogether.

Seret Dunn says that after passing over shaking up, if it does not blow him off to sea altogether.

Sergt. Dunn says that after passing over Florida his cycloneship will first take a short trip straight out to sea, when he will return to his Gulf of Mexico antics, resume his scrpentine twisting and finally wriggle back to the coast again. Where it will strike us is uncertain, but the probability is that it will be somewhere in the neighborhood of Cape Hatteras or south of it.

At all events there is still great danger to all vessels sailing for the Southern ports, and danger signals have been flying all along the Southern coast for the past two days. "The storm is one of the most severe of its kind that has been reported from the South in years, and its danger cannot be exaggerated," says Sergt. Dunn.

Another danger, however, threatens from the Northwest, and the storm which was reported as gathering in Manitoba yesterday has developed to such proportions that it

ported as gathering in Manitoba yesterday has developed to such proportions that it now extends all over the upper lake region. It was central at 8 o'clock this morning over Marquette, Mich., and is moving east at a rapid rate, bringing rain and wind with it.

The rain that fell over the northern part of the constry this morning was caused by this the country this morning was caused by this storm, and more of it will come before even-ing preceded by warmer weather. Whether the two storms will meet or not the weather clerk was unable to state this morning, but from a meteorological standpoint such an event is by no means unlikely to occur. If it does there will be 0ld Hobb to pay, and the weather authorities want the public to understand that they will assume no re-

sponsibility for the consequences of such catastrophe.

It may be comforting, however, to learn that nothing more serious than a repetition of the March blizzard is anticipated. The

of the March blizzard is anticipated. The two storms are still pretty far apart, and there is some ground for hope that the Marquette tornado can be hurried up to Maine and assisted over the border before the Mexican cyclone arrives. In such an event all may yet be well.

A Happy Man.

A Matter of Oplnion. [From the Washington Critic.] The car had run off the track. "Well," said the old man, "I think it is time atreet cars were run on acientific principles."
"Darn the principles," replied the young man;
"I think it is time they were run on the rails."

Again that blessed ninth inning. And the Chi-cagoes caught the racket yesterday, too. Did you notice? Quinn, of the Bostons, batted another home run yesterday, and added to it two three-baggers and

In their half of the ninth, yesterday, Anson's bables pounded Clarkson for two three-baggers a double and two singles. The prospect of those high hats for Boston is narrower than it was. The double umpire plan worked bravely at in-dianapolis yesterday, and kickers subsided into That pennant is still nearer, but Mutrie won's say so even yet.

Chorns of Croakers-Why, oh, why don't the Giants tumble?

Giant base hits weren't many yesterday, but were put where they would count. We're doing our best, Washington, but you must pull, too. It wasn'st strictly courteons to the Colonels, on the first day, but that's the baseball way to do it, Brooklyn.

SO FREDERICK BEARDSLEE TURNED PROM DESPAIR AND COURTED DEATH.

He Was an Electrical Expert, He Had No Money and His Family Was to Be Turned From Its Home in Breeklyn— The Tragedy of Last Night Revealed This Morning in a Beckman Street

The world had lost all its brightness, life all its pleasures, for Frederick E. Beardslee, and he gave up both last night for the unknown and unknowable. Beardslee was a man forty-five years of

age, a well-known electrical expert, and resided with his wife and child at 178 Willoughby avenue, Brooklyn. Twelve years ago Beardslee introduced the electric light to the Mexicans and made con-

siderable money. He also represented the Edison Company at Paris for a time. Lately he has been rather hard pushed for

One of Beardslee's close friends is J. H. Guest, another electrical expert, who has an office at the corner of Cedar and Pearl streets, and to him the dead man confided his financial troubles. He said that his employer, Radeliffe, owed him a large amount for wages, which he could not get, and that his family was about to be dispossessed of its home for non-payment of rent.

Yesterday Beardslee went to Mr. Guest.

Mr. Guest tried to negotiate them without success.

At 5.30 Mr. Guest asked Beardslee to go to Brooklyn with him across the Fulton Ferry, but the latter said that he would remain and try to raise some money on the stock.

Instead of raising any money Beardslee sat down and wrote a letter to his wife announcing his intended suicide, went to the laboratory in Beekman street, laid himself out on a table with a pillow improvised from a coat under his head and died after taking a dose from some of the deadly poisons with which the laboratory abounded.

A drinking glass partially filled with water, in the bottom of which there was a sediment of white powder, stood near by.

Mr. Guest said that he had promised Beardslee some money to tide him over his present difficulties this morning, but the poor fellow must have given up in utter despair.

Guest said that he and Beardslee had a joint interest in an electrical contrivance which promised to be remunerative as soon as they could get the capital to float the enterprise.

JERSEY CITY NEW

Democrats Get Ahead of Terry McDonald in the Banner-Raising Business.

Democrats under City Marshal Lang.
The disastrous result of Terry's attempt to flaunt the portraits of Harrison and Morton in the heart of the "Horseshoe" will serve to keep him quiet for at least a week.
The report that he fled from the city when he learned that the Democrats had outwitted him by securing the years owners and stable

which he had selected for his demonstration is not so.

While the speechmakers shouted last evening "Terry" held forth in a saloon a few doors away and talked for trusts to all comers. The feeling against Terry and the "flop" is very high, and it is believed that if he raises his banner next week, as he promises, the scene will be one of riot.
